COMPANY PROFILE

From Korea, *across markets.*

Company overview

We are a Korea-based international trading and sourcing company. Our work begins with a buyer’s requirements and a conversation with the people who make the product.

In industrial procurement, we act on a buyer’s sourcing mandate. In cosmetics, we source and export selected Korean products for professional channels. We agree the role, commercial terms and documentation for each project.

Markets

South Korea	Headquarters & sourcing
United Kingdom	Professional skincare market
Poland	Industrial sourcing market

Business areas

Strategic sourcing & trading

We turn a purchase brief into a shortlist of suppliers and comparable commercial terms. Where appointed as buying agent, we coordinate specifications, quotations and samples on the buyer’s behalf.

Professional Korean skincare

We source Korean skincare for professional cosmetic channels, with a focus on barrier care, hydration and aftercare ranges. We coordinate product information, samples, packaging and export terms for the intended market.

Chemical products sourcing

We coordinate enquiries for industrial chemicals, including grades, packaging options, volumes and delivery terms. Product review draws on supplier-issued technical data sheets, safety data sheets and certificates of analysis where applicable.

International business development

We help parties assess market fit, exchange proposals and agree next steps. We coordinate communications among the buyer, manufacturer and logistics providers throughout the transaction.
